

Summary

12+ years of experience driving intuitive, scalable user experiences. Specialise in problem framing, requirement analysis, and simplifying complex systems. Extensive experience building and leading UX teams and delivering projects end-to-end in cross-functional environments. Combines development and management expertise to align user needs, technical feasibility, and business goals.

Skills

UX and Delivery

Requirement analysis & problem framing, usability testing, ideation & workshop facilitation, IA, interaction design, wireframing & prototyping, design systems, accessibility, design reviews & critique, Agile/Scrum delivery.

Leadership and Collaboration

Estimation & planning, Stakeholder and client communication, cross-functional collaboration, team leadership, recruitment, conflict resolution.

Technical & Tools

Figma, Adobe XD, JIRA, Redmine, Microsoft Suite, HTML5, JavaScript, SQL.

Experience

UX Architect - Srijan (now Material)

Feb 2022 – May 2025

- Led and managed UX teams across multiple client engagements, overseeing day-to-day design execution, prioritisation, and quality.
- Acted as the primary UX lead, partnering with Product, Engineering, and QA to plan work, allocate design capacity, and deliver outcomes across sprints.
- Facilitated discovery and problem-framing workshops with stakeholders, providing direction to designers and reducing rework and iteration cycles by up to 50%.
- Reviewed design outputs, provided feedback and mentorship, and ensured consistency across journeys, patterns, and deliverables.
- Contributed to business development by defining UX scope, resourcing, timelines, and delivery

approach for RFPs and client pitches.

- Established shared design standards and internal libraries to improve team efficiency and streamline collaboration with development.
-

UX Architect — Trigyn Technologies

Apr 2021 – Feb 2022

- Led UX delivery for multiple enterprise accounts, guiding designers and coordinating with cross-functional teams to execute complex workflow-driven solutions.
 - Supported hiring, onboarding, and mentoring of UX designers, strengthening delivery capability across projects.
 - Worked closely with account and delivery leadership on UX estimation, staffing, and planning for new and ongoing engagements.
 - Defined and introduced UX frameworks and workflows to improve consistency and reduce turnaround time across teams.
 - Led research and validation activities to help teams refine problem statements and align solutions with user and business needs.
-

Associate Manager – UX — Trigyn Technologies

Oct 2019 – Mar 2021

- Built and led a dedicated UX team from scratch, including hiring, onboarding, training, and ongoing mentorship.
 - Provided design leadership across multiple projects, embedding user-centred practices that delivered ~\$500K in value and reduced support tickets by over 40%.
 - Acted as the primary UX stakeholder interface, balancing delivery priorities, team capacity, and quality standards.
 - Remained hands-on as needed, delivering IA, wireframes, and prototypes for key initiatives.
-

Project Manager — Plum Tree

Dec 2018 – Oct 2019

- Managed 10+ high-priority projects, ensuring timely delivery while maintaining quality standards.
 - Acted as the primary client contact for updates, priorities, and change requests, leading bi-weekly calls with clients while running day-to-day coordination across internal teams.
 - Coordinated between design, development and business teams to ensure smooth project execution.
-

Design Lead — Zeus Learning

Jul 2014 – Dec 2018

- Led and managed designers across multiple product lines, setting direction from concept through deployment.
 - Conducted requirement analysis and collaborated with business teams on SOWs & proposals.
 - Created IA, low-fidelity wireframes, and interactive prototypes for enterprise and education platforms.
 - Reviewed work, conducted walkthroughs, and ensured design quality and adherence to standards.
 - Performed alpha/beta reviews to ensure adherence to design specifications.
 - Authored detailed design documentation to streamline development and reduce dependency.
 - Owned recruitment and training, including hiring assessments, onboarding programs, and mentoring frameworks.
-

Senior Web Developer — Zeus Learning

Jan 2012 – Jun 2014

- Built frameworks for interactive science-based learning modules.
 - Led a 10-member team building STEM-focused digital experiences.
 - Streamlined development workflows improving delivery speed
-

Web Developer — Zeus Learning

Jul 2009 – Dec 2011

- Developed Flash/AS3 learning modules before transitioning to HTML-based development.
- Contributed to major conversion projects modernizing legacy Flash content.

Education

B.E. Information Technology — Mumbai University (2009)
